DETAILED ACTION

1. This communication is responsive to the amendments filed on July 13, 2005.

Applicant's amendments and remarks have been carefully considered.

2. Claims 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Herbert (US 3,610,434).

Herbert, Figure 3, shows an emergency release mechanism having all the features recited in the instant claims, including a stud formed by a combination of lower threaded end 42 as first connector, head 36 as a second connector, and middle unthreaded body 37. Regarding the instant claimed flat surface on the body of the stud, note that the lower end of body 37 of Herbert's stud has a tapered portion followed by a narrow flat radial end surface that directly engages flat bottom surface 48 of the recess in member 18.

Regarding method claims 14-15, note that the method of attaching the emergency release mechanism of Herbert inherently requires the method steps recited in instant claims 14-15.

3. Claims 1, 3-9 and 11-12 are allowable.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3617

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
